

MUZZLE

Do not muzzle the animal if it is vomiting, coughing or is not breathing normally and if you leave it unattended .

- 1 Make a large loop in the material;

- 2 Stand behind the animal and slide the loop around its nose;

- 3 Tighten the loop on the animal's nose;

- 4 Wrap the ends around the animal's nose, criss-cross them under its chin and tie them behind the animal's head. The animal should be able to breathe normally.
