

# FISH HOOKS

Fish hooks are often found around the face, muzzle, and on the paws. If the hook is stuck in the skin, follow these steps to safely remove it:

If the hook has been swallowed and the fish line can be seen in the mouth, do not pull on the fish line. Call the Veterinary Help Line to seek veterinary advice immediately. This is an emergency and your animal should be seen by a veterinarian.

Contact the Veterinary Help Line to seek free veterinary advice at 514 345-8521 ext. 0065 or [nunavik@chuv.umontreal.ca](mailto:nunavik@chuv.umontreal.ca)
